

POOL SAFETY

- I am aware that the pool is very deep at both ends with depth 1.85m.
- I am aware that the pool is not a children's swimming pool.
- I am aware that the pool does not have a lifeguard and that my children have to be supervised at all times (in and around the pool) by me.
- I am aware that my children are not allowed to enter the pool area without my presence.
- I am aware that diving and running around the pool are forbidden.
- I am aware that the pool surroundings can be wet - so children have to walk slowly around the pool area to avoid accidents.
- I am aware that it is forbidden to enter the pool after having eaten.(at least 2 hour after) or consuming alcohol.
- I am aware that all the children are in danger of drowning even if they know excellent bathing
- I am aware that my children have to behave properly , do not disturb the other guests and do not jump into the pool – in any other case the management of the hotel has drive the child/children out of the pool area.
- I am aware that if my child swallows water and has a severe cough , my child must be transferred to the hospital; there are not only a few cases of the so-called "second drowning" of aspiration of water in the lungs leading to pulmonary edema (24-hour follow-up in the hospital)
- I am aware that the entry in our pool is allowed only for residents in Zoe's Resort Hotel and Apartments
- The Management is not responsible in the case of accidents caused by ignoring the above rules and that I will be held personally responsible for any accident that might happened in the pool area ignoring the above rules.
- Pool operates from 11:00 to 19:00
